DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: the specification does not contain a section entitled Brief Description of the Drawings. MPEP 608.01 (f). Appropriate correction is required.

Claim Objections

Claim 7 is objected to because of the following informalities: there is an obvious misspelling in the 5th line of the claim ("ninto"). Appropriate correction is required.

Applicant's assistance is respectfully requested in correcting any other spelling and/or grammatical errors that may be present in the claims.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 10 recites the limitation "the first separation sequence." There is insufficient antecedent basis for this limitation in the claim. Claim 11 recites the limitation "the second separation sequence." There is insufficient antecedent basis for this limitation in the claim.

The examiner respectfully suggests that a clear and consistent nomenclature/description be maintained throughout the claim set. For instance, there is an explicit labeling of a separation sequence 3 in claim 11 (but no similar labeling of other separation sequences such as sequences 1 or 2 in the claim set).

Claims 12 and 14 are also rejected under 35 USC 112, second paragraph, as claims which depend from indefinite claims are also indefinite. *Ex parte Cordova*, 10 USPQ 2d 1949, 1952 (PTO Bd. App. 1989).

Allowable Subject Matter

Claims 1-6, 8, 9 and 13 are allowed. The subject matter of the remaining claims would be allowable once the objection and 112 rejections outlined above have been overcome. The following is an examiner's statement of reasons for allowance:

The key to the instant invention is the separation of EDA from the product stream of the first reactor and its introduction into the second reactor. The closest prior art appears to be EP 0197611, cited by applicant in the IDS. The cited reference teaches a process related to that of the instant invention (column 3, line 44; column 4, line 14; column 5, line 40)). The reference neither teaches nor suggests applicant's key separation step, however.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
